

Summer  
School in  
**Peptide  
Science**

# JOIN US IN AUSTRALIA FOR ADVANCED PEPTIDE SCIENCE

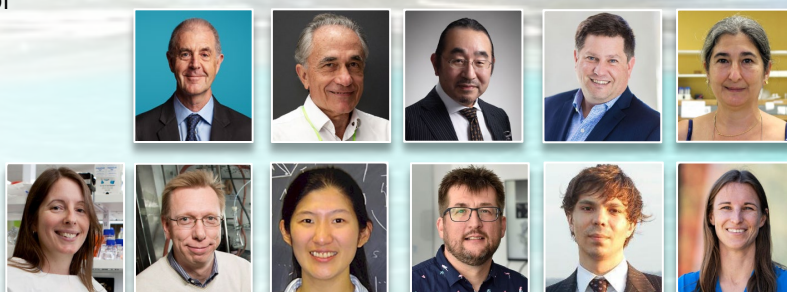

Heron Island | 12 – 19 July 2026

The **Summer School** is an initiative of the **Australian Research Council Centre of Excellence for Innovations in Peptide and Protein Science (CIPPS)** and will run in conjunction with the **5th International Conference on Cyclic Peptides (ICCP)** at Heron Island Resort on the Great Barrier Reef, Australia from 12–19 July 2026.

We have designed the Summer School for the training of graduate students and early-career post-doctoral researchers. Our teaching faculty will include leading international experts who will deliver lectures and workshops spanning peptide discovery, green chemistry, computational design through to peptide translation.

Building on the impact of peptide science in the pharmaceutical and agricultural sectors, the summer school is designed to inform and educate emerging researchers, equipping graduate students and early-career researchers with knowledge from world leaders in synthetic organic chemistry, biochemistry, chemical biology, enzyme and protein engineering, to empower them as leaders of tomorrow.

## Our teaching faculty for the 2026 Summer School
